### **Your Possible Survival Scenario**

You and your friends are hiking deep in the Adirondacks wilderness. You wisely make camp 02-hours before sunset.

YOU direct all your friends to gather piles of pine needles, dry grass, kindling, and sustaining fuel. You set up your firepit and wait till it's dark.

You step 06-feet away from your firepit and shine your flashlight down at your firepit. In just a short 02-seconds, **the beam of light from your flashlight starts a blazing bright fire!**

All your friends scream and cheer in amazement. Everyone wanted to know how you did it! You are now the center of everyone's attention!

### Your Possible Survival Scenario

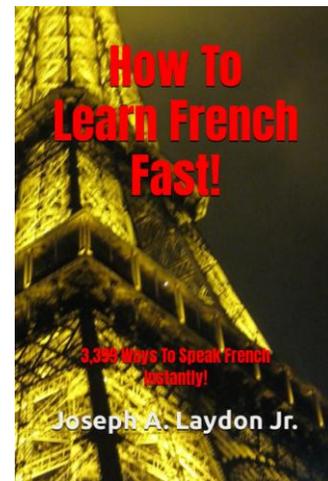

*You and your friends are hiking in the mountains of Montana. You stop and make camp. You build campfire. You observe the smoke going straight up. It's a beautiful day with the temperature being in the 70sF.*

*Suddenly you notice the smoke in the campfire go from straight up to now horizontal and low to the ground.. You **ALERT** everyone to pick-up the pace and prepare all the shelters.*

*An hour later, the temperature dropped from 70-degrees F to the low 40-degrees F.*

You just saved the lives of all your friends because you know how to forecast weather using the smoke from your campfire.

### Your Possible Survival Scenario

*You and your friends are hiking in the Colorado mountains and the summer weather is beautiful (without warning - the maze of mountains & valleys can create their own killer weather).*

*Suddenly the winds pick up, the temperature dropped like a rock and now it's snowing.*

*No one is prepared except you. You direct all your friends to gather piles of tinder, kindling, & sustaining fuels and make camp.*

***You take your toothpaste out of your backpack and to everyone's amazement you start a life-saving emergency fire in just seconds.***

*YOU just saved the lives of all your friends!*

When you go out in the vast beauty of Mother Nature to hunt, camp, hike, fish, explore, and even on combat patrols (military)... the many wraths of Mother Nature and all She possesses is absolutely unforgiving to the ignorant and disrespectful.

And one of the sure KILLER WRATHS of Mother Nature and all She possesses are killer freezing temperatures.

Mother Nature and all She possesses is absolutely unforgiving and doesn't care if you're a law-abiding, turn the other cheek, pet-loving person or a downright piece of sh!+ scumbag - either way you're at the mercy of yourself!

ONLY YOU - ONLY YOU with your own immediate emergency actions can save YOU and those under your care, to survive to see the next day. No wishful thinking here, no 'THE SECRET' - wishing crap here.

Your next immediate emergency actions will decide your own fate. It's up to you and only you. You and those that are depending on you are another set of 'dead statistics' real quick or you are the HERO and everyone is alive cause you started an **EMERGENCY LIFE-SAVING FIRE** using a coffee drink flavor supplement!

You started an **emergency life-saving fire** where 99.999% of most folks - even those so-called 'survival experts' will surely fail and die in place along with all those innocent people that depended and trusted him / her with their very lives.

The *02 Greatest Enemies of Survival* are **FEAR** and **PANIC**. And throw in some cussin' cold, frigid, freezing temperatures - you and everybody with you won't see the next sunrise. And if everyone is soaking wet - break out the crayons & color you all DEAD DEAD and that's a stone cold 'another set of dead statistics' fact.

Of the *8 Elements of Survival* (Fire, Water, Shelter, First-Aid, Signal, Food, Weapons, and Navigation), in my humble & experienced opinion, pound for pound - **FIRE** is the most important in most survival situations. **FIRE** gives you that sense of security at day and especially at night. 99% of most critters want nothing to do with **FIRE**. **FIRE** is a great beacon for rescuers and most important, **FIRE keeps killer hypothermia from taking another life - your life and the lives that depend on YOU**. And there's also a laundry list of benefits from **FIRE**.

**"Save My Life - Basic, Advanced, And Ultra-Advanced Emergency Fire-Starting TOTAL Package."** covers emergency fire-starting that WORKS.

**NO FRICKN' RUBBING 02 STICKS TOGETHER** here. I have NEVER and NEVER will teach those prehistoric fire-starting methods. Why? They are **TOO DIFFICULT**. And will NEVER NEVER - work when you're truly hypothermic.

And you'll read how I start emergency fires. I teach basic, advanced, and ultra-advanced emergency fire-starting.

Most of the advanced and especially the ultra-advanced fire-starting applications ARE MY OWN COPYRIGHTED INVENTIONS!

Hey, if you get in trouble and everybody is starting to go hypothermic, YOU need an emergency **FIRE** NOW, RIGHT NOW. Not 40-minutes or 04-hours from now trying to rub 02 frickn' sticks together - YOU NEED A LIFE-SAVING EMERGENCY **FIRE** RIGHT NOW!

### Your Possible Survival Scenario

*You and your fishing buddy are on an isolated lake fishing in a boat provided by the owner. The lake can only be reached by trekking from the road 03-miles away. It's cold but not freezing. Both you and your friend are both good swimmers and your both wearing your life-vest.*

*Off in the distance you see a couple with their child in another loaned boat. They are not wearing any life-vests, even though life-vest come with each boat.*

*After an hour, you and your buddy are celebrating catching 04 good-size fish. Suddenly you hear some yelling and splashing from the boat a few hundred meters away. It turns out the child fell out of the boat into the cold water. The screaming mother jumped in the water after her child followed by the father trying to rescue his wife and child.*

*You and your fishing buddy immediately drop your fishing poles, start-up the outboard motor and race to the couple and their child. You reach all three barely keeping their heads above the freezing water. You pull all three out of the freezing water and head to the shore. All three are already going hypothermic.*

### ***You saved the lives of the couple and their child by using "Sauna In A Can"***

YOU just saved three lives!  
+++++

Have YOU ever been truly hypothermic? Have you ever been truly hypothermic when your hands & fingers will not work (you can't even use a lighter or matches), you can't even tie your shoe laces - your hands & fingers will not work - they feel like wood. You and everyone with you are shivering non-stop, and cussing up a storm too or trying to cuss!

You're so cold, even your mental faculties are going out the window too. Simply talking and trying to put words together is difficult. I'm telling you, I've been severely hypothermic several times (military) and only my extreme stubbornness kept me alive. Back then I too couldn't start a life-saving fire if my own life depended on it.

In 1991, I started putting my own Survival Programs together. And since the late 1990s, I've been challenging anyone to come forward and show me a better survival program, better survival course, better survival book,.. (military or civilian). No one has yet to come forward. And my Survival Programs have progressed and improved from 1991 to the present day.

I teach basic, advanced, and ultra-advanced emergency fire-starting. Most of the advanced and especially the ultra-advanced fire-starting applications ARE MY VERY OWN COPYRIGHTED INVENTIONS! You'll read how I start & sustain 249+

emergency fire applications using:

- basic fire-starting (many) advanced fire-starting (many)
- ultra-advanced fire-starting (read below)
- shampoo
- mouthwashes
- toothpastes
